

Protocol for obtaining lupinus milk

BOLIVIA, CHILE, ECUADOR

Webstory

Technological solution

Promote the development of technological innovations to strengthen the resilience of production systems through the insertion and added value of lupine to contribute to improving the livelihoods of farmers in the Andean region.

Technological description

A protocol was developed to obtain powdered lupine milk through the spray drying technique.

Impacts and results

- New technologies have been generated to improve lupine productivity.
- Families that sell lupine receive an additional profit (10% more) compared to the traditional market.
- Lupine products are used as substitutes for milk and meat in certain regions.
